Cooperation Needed to Build Rural Fiber

vianet

- A champion from the Local Municipality
- A few dedicated local residents
- Cooperative local governments
- Provincial Governments
- Federal Governments

Quote: Ken Ferdinands

- “…thank you all for looking beyond the present. This project advances in increments; the areas that would like to be next are already anticipating the next deployment. The good faith you have extended is most gratifying and generates the confidence needed to forge ahead.”

  Regards,

  Ken Ferdinands, Councillor, Ward 1

Quote: Michael C.

- “One of the biggest highlights for me, aside from the great technology, is having Daniel to call in the office to make changes to the account. Last week I requested a Static IP address and it was active within ½ hour … Amazing!! After many painful years dealing with other carrier call centers this is a great added value that Vianet brings to the table.”

  Michael C.

  New fibre customer – Jesse Thomson Rd.

Quote: Jack H.

- “Well we did it! I would like to thank each of you for helping to secure Fiber Optic Internet and Cable for our community. All of you made phone calls, sent emails or knocked door to door for conversations and without this type of mobilization we would never have achieved the target. Finally, thanks must also go to Brian and Luke from Vianet. They never stopped believing that we could get to a number that would work for both the residents and also for the Vianet stakeholders.

Once again thank you and happy surfing to everyone!”
